NEW WORKS

WITH ANAS IN SICILY

A new challenge! We are the contractor for the Lot 2 from the junction No. 3 on the Provincial Street 5 (included) to the junction No. 5 "Grammichele" (excluded) of CT 13-22 on behalf of Anas SpA. The amount of the works exceeds 250 million EUR. A heartfelt thank you to all who have dedicated themselves to achieving this very important goal!

GENOA, THE 4 AXES OF STRENGTH

The ICM Group, together with Leonardo SpA and Colas Rail Italia SpA, was awarded the work pertaining to the design and construction of the axes of strength system for the local public transport in the city of Genoa (Lot 1 and Lot 2) for a total of about 180 million EUR. There will be 145 trolleybuses and 18-meter electric buses, which will be purchased this year by the Municipality of Genoa, running on the strength network, which, in total, will cover 96 kilometers from East to West and in the valleys, passing through the city center. Hurray!

FERRANDINA-MATERA WITH RFI

We joyfully announce the awarding of the RFI Rete Ferroviaria Italiana (Italian rail network) contract for the Ferrandina-Matera leg.

A 308 million EUR work financed also with NRRP funds. The new line will allow connecting the city of Matera to the national rail infrastructure via a 20-kilometer single-track electrified line. The Matera La Martella station will be served by both a direct link to the Ferrandina station and a northbound connection via the new link to the Battipaglia-Potenza-Metaponto line. One of the South symbolic unfinished works will finally see the light of day. The engineering was entrusted to PROGER SpA, Rocksoil SpA and INGEGNERIA DEL TERRITORIO Srl.

Warmest congratulations to everyone!

WE CONSOLIDATE IN AUSTRIA

ICM hits another target attaining a new awarded contract in Austria: the project concerning the rebuilding of two viaducts on the A10 (Salzburg-Carinthia) highway. Duration of works: four years; contract amount: about 48 million EUR. The award of this third project, following the A26 Linz and ÖBB Marchtrenk contracts, consolidates the ICM Group presence in Austria. We are unstoppable!

WORKS IN PROGRESS

METRONAPOLI

The Chiaia subway station in Naples is a project for which we are extremely proud! A major work, a hinge between the Monte di Dio and Chiaia areas, with a very high degree of technical complexity. A close-knit and reliable team that leaves a marvelous mark on the core soul of the Neapolitan city.

THE AFRICAN SMART CITY

The Smart City of Konza will be home to more than 200,000 residents who will have residence and social housing, offices, schools, and an efficient green transportation system available. The city will comply with the highest standards in terms of energy saving and will adopt sustainable architectural solutions and advanced technologies. There will also be a state-of-the-art technology hub with hi-tech research centers and universities. A pioneering project that will contribute to Kenya socio-economic development; it will be the first "smart city" on the African continent.

As you can see from the video below, works are strongly evolving!

A26 HIGHWAY IN LINZ

Works are also proceeding apace in Austria, where we are engaged in the A26 Highway project. The construction of the four-lane cable-stayed bridge with a length of 385 m over the Danube and the construction of the connecting tunnels north and south of the bridge with a total length of about 3.3 km are coming to life! Come on, keep going! Below there is a significant video.

NEWS

1 ICM CORPORATE WELFARE

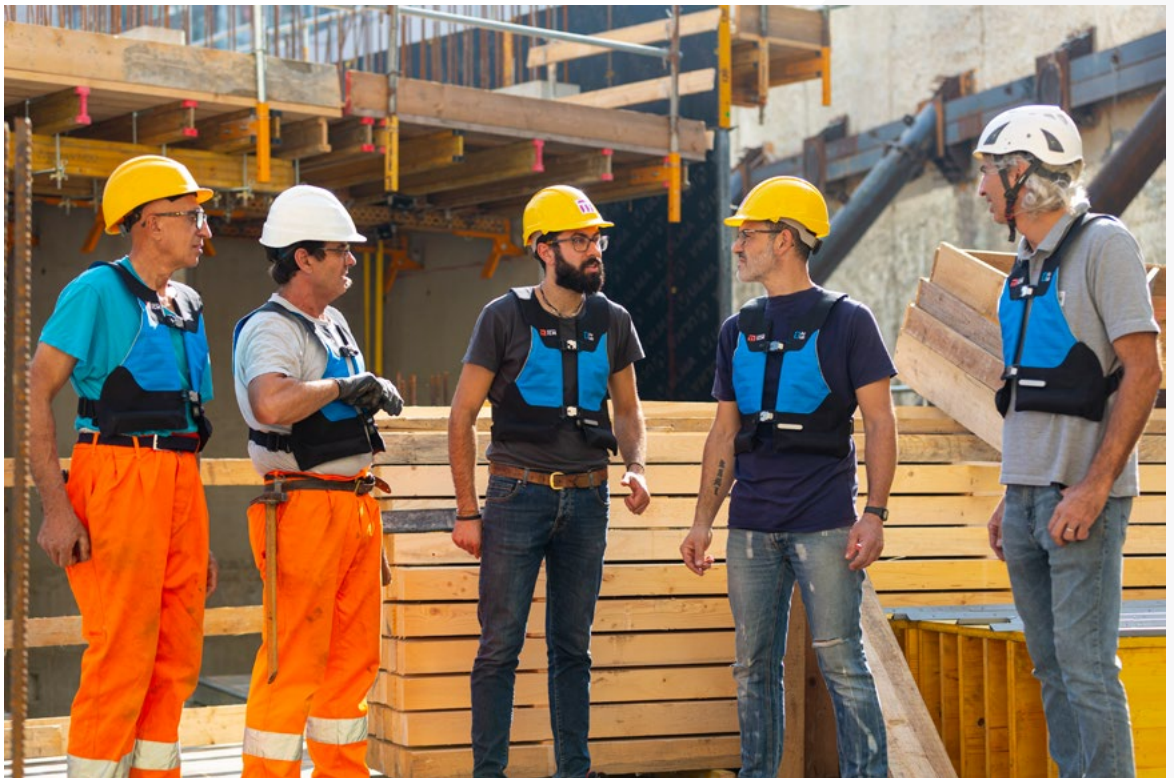

Between the end of the year and the beginning of 2023, we have allocated 200,000 EUR to corporate welfare policies because we believe that human capital is the real and actual resource of this Group. We are also working on social sustainability through a process of rejuvenation and a reduction in the gender gap, a topic of particular relevance in the context of a sector such as the construction one. All ahead full!

2 D-AIR LAB WORKAIR WINS THE ADI INNOVATION AWARD

The D-Air Lab WorkAir, the world first airbag for protecting workers working at height that is certified as a PPE (Personal Protective Equipment), has been selected as one of the best Italian designs of 2022 and won the ADI Design Index 2022 Innovation Award!

ICM Group employees are using it for the massive urban regeneration project, called "I Portali" (The Portals), in Porta Nuova in Milan. The 3 key words that justified the selection for the award are: freedom, quality, and system! This is Italy strength, and we are proud to be part of it.

3 MEETING IN LINZ

A meeting organized by the Linz Region with Italian companies in Austria was held in mid-January. The event was attended by several dignitaries including the Italian Ambassador to Austria Stefano Beltrame, the Mayor of Linz and the president of the Linz Region. Much of the meeting was devoted to our A26 project for which we received praising words. The customer, Asfinag, was very pleased with the progress of the works and the cooperation with our Group. Kudos to the team that is managing the site meticulously and with great professionalism!

NEW RECRUITS

NAME	FUNCTION	PROJECT/SITE	COMPANY
