

# VIA GAZZOLLE

WINTER 2021

 **ICM**  
GROUP

THE CULTURE OF BUILDING

Dear All,

On February 16th, 1921 Giuseppe Maltauro founded his own construction company in Recoaro, a town in the province of Vicenza, in Italy, taking over the work means and the activities of a small cooperative company to which he belonged.

His son Adone, with the Italian honorific of Cavaliere del Lavoro, highlighted the company's activity and allowed it to become a reliable presence in the sector.

Today, ICM Group is a nation-wide important reality, strongly consolidated and competitive, with technologically advanced works on international markets in Europe, in the Middle East and in Africa. After 100 years, despite the inconceivable pandemic situation we are currently experiencing, we remember the founding values that allowed us to reach this progress, paying tribute to the passion, resilience and skills of our employees who help us every day to build our future.

We also remember today all the people who are no longer with us and who have dedicated their lives to this common, great adventure of ours.

A big hug.

# DELIVERING BUILDING SITES

## CORSO COMO PLACE IN MILAN

The Corso Como Place project, developed according to the highest standards of innovation and sustainability, was completed by ICM Group for the client Coima SGR. An important area in the center of Milan was therefore returned to the city as a new driving force for development and evolution for the years to come. Two office and commercial buildings with a futuristic design to make a portion of the city shine just a few steps from Porta Garibaldi station.

## GARDALAND WATER PARK

The Verona area construction site for the new themed area of the Gardaland amusement park has been completed. The 15,000-square-meter area includes ticket offices, slides, pools, locker rooms, playgrounds, scenic structures, food courts, stores, warehouses, as well as terraces, stairways, ramps, technical rooms, kiosks, fencing and sound barriers. It's going to be a lot of fun!

## NEW ACQUISITIONS

### CERN SCIENCE GATEWAY

It is with an absolute and great joy and pride that we are pleased to announce the awarding of a contract worth 54 million EUR for the construction of the new "CERN Science Gateway" visitor center at CERN (European Organization for Nuclear Research) in Geneva. This is an ambitious project that bears the signature of the archistar Renzo Piano and that we are going to build through a temporary joint venture - of which ICM is the

leader - together with the company Cimolai based in Pordenone. The work will be mostly funded by the FCA Foundation. A real new reference center covering seven thousand square meters, dedicated to the world of physics, will therefore be created: a center that will be in charge of disseminating science to the general public and explain it to the world. Open to all enthusiasts of these topics, it will consist of workshops, exhibition spaces, a forest with more than 400 trees and a 900-seat auditorium dedicated to Sergio Marchionne.

The works will last until approximately the end of 2022. We are honored to participate in such a relevant project since in this way it will be possible to meet the demand for visits coming from the international public and thus contribute to the dissemination of science, which is of great importance in today's world. We would like to thank all our collaborators for having contributed to the awarding of this project to us. A dream come true!

### EURO HPC SUPERCOMPUTER IN BOLOGNA

With satisfaction, together with Cefla and the DBA Group, we have been awarded the executive design and construction of the site adaptation works for the EURO HPC supercomputer in the area of the Bologna Technopole. The customer is CINECA (Consorzio Interuniversitario per il Calcolo Automatico dell'Italia Nord Orientale), the largest computing center in Italy, founded in 1969 and consisting of 92 public bodies (including 2 Ministries, 69 Italian Universities and 21 National Public Institutions). This project, worth over 45 million EUR, consists of the conversion of the former Manifattura Tabacchi into a Technopole, as well as of the construction of a Data Center that will host the pre-exascale supercomputing system (acquired by JU EURO HPC and hosted and managed by CINECA) and of a Data Center for the CNAF (National Institute of Nuclear Physics) at the Bologna headquarters.

## NEWS

### SECONDIGLIANO STATION

An interesting video on the Naples Metro, concerning the modernization and adaptation of the former Alifana railway line. Section from Secondigliano to Di Vittorio between the pk 2+057 and 3+346 (Secondigliano Station). Kudos to the entire team involved in this project... you made a fantastic work!

### LIMASSOL DEL MAR, CYPRUS

On RAI 3, the broadcaster recently talked about us regarding the "Limassol Del Mar" building project, the largest underway in Cyprus. Watch the video from minute 14 to minute 18!

### BORGO BERGA, VICENZA

A place where the modernity of today and the neighborhood life of the past do coexist. Borgo Berga is the new residential, office and commercial complex in the heart of Vicenza: a redevelopment project concerning a former industrial area transformed into a prestigious context where to live, work, but above all live in a contemporary way.

## PUBLIC CONTRACTS OBSERVATORY

We are on the podium of the “2020 Public Contracts Observatory” ranking of the top 50 companies in the public works market, or rather of the Tender Offices that have allowed, with their work, the acquisition of new Public Contracts through their work.

These results were obtained by processing data disclosed by thousands of Italian public administrations, pursuant to the requirements of the Italian anti-corruption law L.190/2012. A sincere round of applause to our collaborators!

## YET ANOTHER AWARD FOR M9

M9, the Museum of the XX century, wins The Plan Award 2020, one of the most authoritative and coveted awards at national and international level, which aims at promoting the awareness about and the quality of the work of designers, academics and students in the fields of architecture, design and urban planning. The project of Fondazione di Venezia, signed by Sauerbruch Hutton (integrated design and construction management by SCE Project) and built by ICM Group, ranked first in the Urban Planning category.

## KONZA SMART CITY

Greetings and best wishes for the 100-year celebrations from the Konza Smart City team!

## NEW RECRUITS

Name	Function	Company
Amedeo Giano	SITE HEALTH-ENVIRONMENTAL MANAGER (Switzerland)	ICM S.p.A. Branch office in Geneva
Angelo Orofino	SITE PLANNER (Switzerland)	ICM S.p.A.
Antonio Stanchi	ELECTRICAL SYSTEMS MANAGER (Montecchio)	ICM S.p.A.
Bachar Rizk	SITE TECHNICAL OFFICE EMPLOYEE (Kenya)	ICM S.p.A.
Francesco Aiello	SITE TECHNICAL ACCOUNTANT (Cepav2)	ICM S.p.A.
Mattia Scalabrin	TREASURY OFFICE EMPLOYEE (Headquarters)	ICM S.p.A.
Valentina Baù	TREASURY OFFICE EMPLOYEE (Headquarters)	ICM S.p.A.

We thank you for joining our Group and wish you all the best for a successful career!
