NEW ACQUISITIONS

GIOIA 20" BUILDING COMPLEX

The ICM Group is proud to have been awarded the works related to the construction of two towers (Gioia Est and Gioia Ovest) in Milan in the vibrant area of Porta Nuova.

The works are worth 122 million EUR and the customer is Coima SGR SpA.

The buildings will host open space offices as well as offices designed to accommodate co-working spaces. The project will be certified as LEED PLATINUM level and WELL GOLD level and its materials will be certified C2C, besides being carried out in accordance with the requirements useful for the WiredScore certification.

We are ready for this new challenge!

LEONARDO S.P.A. ENTRUSTS ICM WITH TWO IMPORTANT CONTRACTS

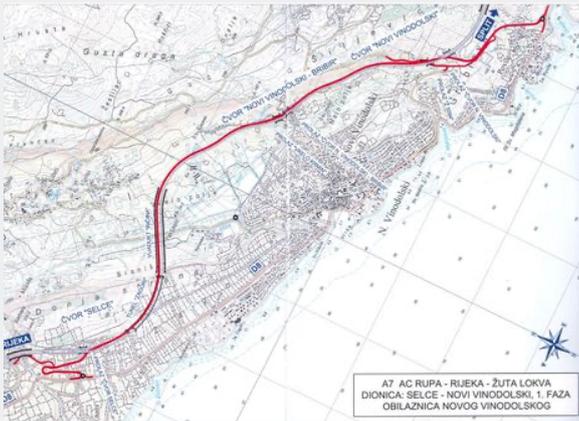

It is with absolute joy that the ICM Group has been awarded two major contracts in Italy on behalf of Leonardo SpA.

We are proud to have received this further proof of trust from a major player; our company once again proves itself capable of acting as an authoritative and reliable partner in its reference sector.

Well done!

NOVI-VINODOLSKI HIGHWAY BYPASS

On the A7 Rupa-Rijeka-Žuta Lokva highway in Croatia, the 7.6 km long left-hand carriageway will be built.

The main works will be the Zagori Tunnel, being about 800 m long, and the Ričina Viaduct, being 1,062 m long.

The amount of the works is 60 million EUR and ICM share is 50%.

WORKS IN PROGRESS

A LOGISTICS HUB IN ARDEA

In Ardea (Rome) we move forward at the speed of wind!

At the end of January, in fact, we delivered the first third of the logistics hub for the large-scale distribution covering about 40,000 sqmt. The building foresees the use of BIM (Building Information Modeling) and was created with a view to reducing environmental impact; when completed, it will therefore obtain the BREEAM Excellent certification. The customer, P3 Logistics Park, is, therefore, very satisfied with our work up to now. As a consequence, the works will continue with determination even in the near future in order to meet the very challenging schedule foreseen for this project that is worth almost 40 million EUR.

Congratulations to the team!

PIACENZA, AT THE SERVICE OF GENERALI S.P.A.

In Piacenza we are involved in the executive design and construction of a logistics hub, on behalf of Generali Real Estate SpA, with BREEAM (Building Research Establishment Environmental Assessment Method) certification.

This is a building sustainability rating system that takes into account several environmental requirements such as energy and water consumption, indoor environment (health and well-being), pollution, transportation, materials, waste, ecology, and management processes.

We believe in a more sustainable and functional future for all!

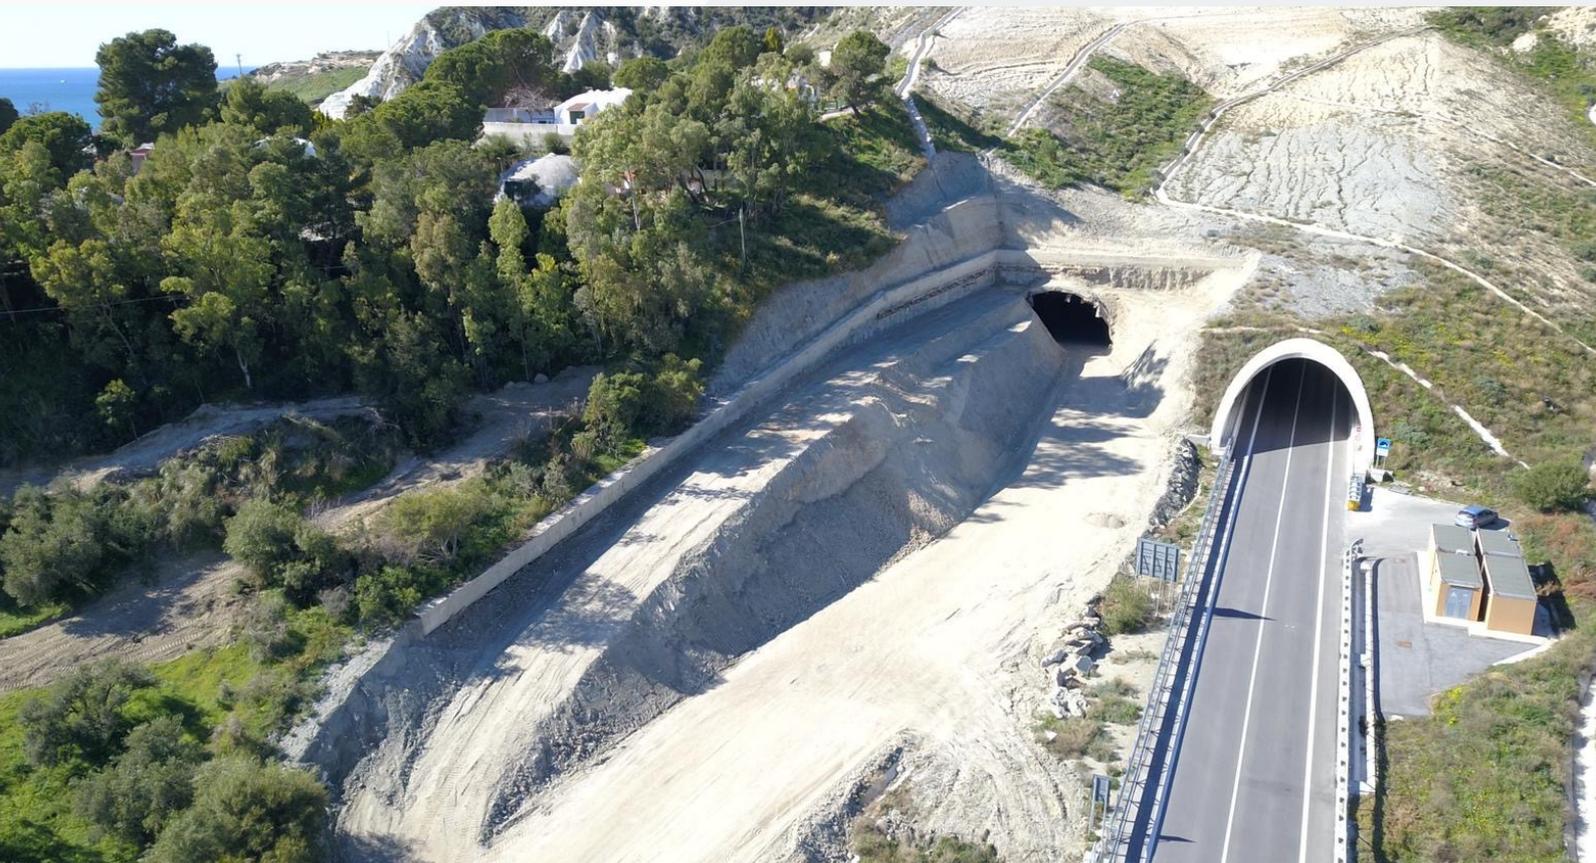

THE BYPASS TO THE TOWN OF PALIZZI MARINA

Works have started on the second functional section of lot 2 of the Palizzi Marina (Reggio Calabria) bypass.

The customer is ANAS SpA and the work amount is around 73 million EUR.

The colleagues are ready to take on this adventure putting their skills to the test, exploring, and learning!

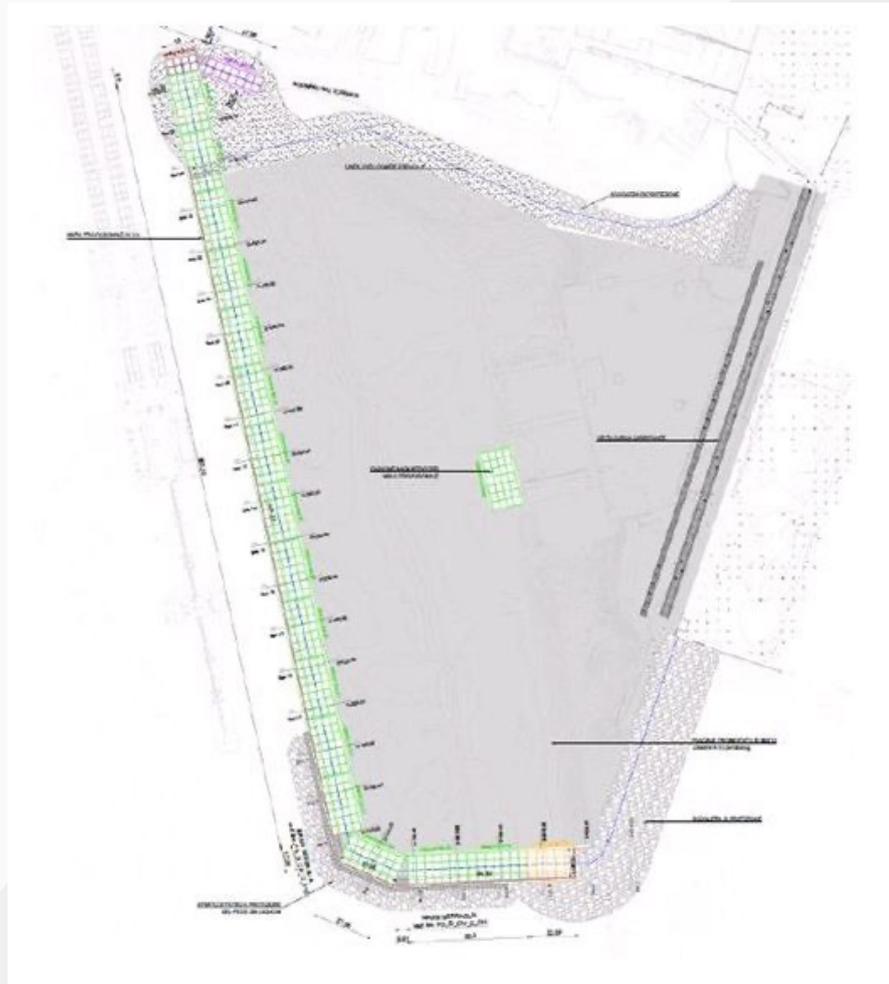

OIL PORT IN GENOA - SESTRI PONENTE

The launching and sinking of the first reinforced concrete cellular caisson have been completed. T5 - this is the name of the caisson - is the first of 18 similar structures that will gradually be "sunk" in the stretch of water in front of the Sestri shipyards to allow for expansion.

The project "Realization of the new quay to be used by the shipbuilding industry within the Oil Port in Genoa - Sestri Ponente and hydraulic works on the Molinassi stream, 2nd lot, 2nd section" is part of the Extraordinary Program of interventions foreseen by the Genoa Decree.

The Implementer of the specific intervention is the Municipality of Genoa, while the works are carried out by the temporary joint venture driven by Fincosit Srl, Consorzio Stabile Grandi Lavori Scarl, Consorzio Integra Soc. Coop., and ICM SpA.

NEWS

1

SIMEST S.p.A., a company belonging to the CDP Cassa Depositi e Prestiti Group, is supporting the growth of our Group abroad, by subscribing a 4 million EUR capital increase in the ICM Swiss subsidiary, with the joint intervention of the Venture Capital Fund, a facilitating instrument managed in agreement with the Ministry of Foreign Affairs and International Cooperation.

2

INTEGRA S.r.l., a company of the ICM group, has been awarded two interesting contracts for a total value of more than 2.5 million EUR: an environmental requalification intervention at the Roncajette (Padua) site and an upgrade of the urban wastewater treatment plant of the Calice (Prato) purification plant. Congratulations and lots of success!

3

SIPE S.p.A. continues its improvement in the environmental arena. Now its products are environmentally preferable. After 2018, year of achievement of the Environmental System Certification according to UNI EN 14001, now SIPE reaches the goal of the certification by ICMQ of the Minimum Environmental Criteria (CAM).

Design solutions for environmentally better products throughout the life cycle are identified for the various stages of the purchasing process.

4

On February 24, our President Gianfranco Simonetto took part in “First. La città, le imprese, il capitale umano, la sfida del PNRR” (First. The city, the companies, the human capital, the NRRP challenge), the event through which the new edition of Top 500 2021 - a research dedicated to the financial statements of the leading companies in the area carried out by PwC Italy and the University of Verona - was presented. With regard to the “Infrastructure and ecological transition” theme, Mr. Simonetto reiterated how the NRRP is an opportunity for the entire construction sector; a unique event to relaunch the entire supply chain, which includes, first and foremost, infrastructure and urban redevelopment.

Here below you'll find the interview of Mr. Simonetto:

5

We congratulate our colleagues (from left) Viviana Caponio, Enzo Cascioli, and Valentina Petricca for successfully completing the certification session to act as BIM (Building Information Modeling) manager & coordinator according to UNI 11337.

Very good!
